

Department of Physics

Report on student-centered methods

The student-centered methods like interactive method, activity-based teaching and evaluation methods have been adopted, involving the student's right from the planning to the execution level of the activities. The ICT classes are held mostly in a smart room where internet connection is available; hence, a blended method of teaching is also followed by the department.

2020-21			
Name of the student centered activity/method	Date	Students participated	
Group discussion	2-2--2021	III B Sc	
Quiz	6-3-2021	I B Sc	
Seminar	24-4-2021	III B Sc
