- 6. Photographs, Press clippings/News paper publications**

7. Report on the Activity:

Our NSS Unit I&II organised an awareness program on World TB Day in association with the Department of Botany, Zoology and Social Work. We are all fighting to eradicate TB in the society. PHC staff and NSS Volunteers our college teaching staff and students have participated in this program. The theme of World TB Day 2024 - ‘Yes! We can end TB!’ – conveys a message of hope that getting back-on-track to turn the tide against the TB epidemic is possible through high level leadership, increased investments and faster uptake of new WHO recommendations. Following the commitments made by Heads of State at the UN High Level meeting in 2023 to accelerate progress to end TB, this year's focus shifts to turning these commitments into tangible actions. To help countries scale-up access to TB preventive treatment, WHO will release an investment case on scaling up the roll out of TB preventive treatment.
