

## DEPARTMENT OF ZOOLOGY

### Report on Malaria Day Awareness Campaign

The Department of Zoology organized a Malaria Day Awareness Campaign in the nearby villages of Ganapavaram under the guidance of Dr. Sk. Parveen. The program aimed to educate rural communities about the causes, prevention, and control of malaria, thereby promoting better public health practices.

The campaign was formally inaugurated by the Principal, Dr. P. Nirmala Kumari, in the presence of Sri K. V. Ganesh Kumar, IQAC Coordinator, Dr. G. Venkata Ramana, Lecturer in Telugu, Sri J. Venkatesh, Lecturer in Physical Education, and Mr. Arun Kumar, Office Subordinate. All the dignitaries emphasized the importance of community awareness and student participation in addressing public health challenges like malaria.

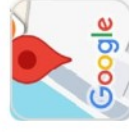

As part of the campaign, students actively participated in door-to-door awareness drives, distribution of pamphlets, and interactive sessions with villagers. They explained the causes of malaria, the role of mosquito vectors, symptoms of the disease, and preventive measures such as maintaining cleanliness, avoiding stagnant water, and using mosquito nets and repellents.

The campaign was successful in creating awareness among the villagers and encouraging them to adopt preventive measures. Overall, the initiative reflected the commitment of the Department of Zoology towards community service and student engagement in real-world issues.
